

## HM01PT & HM01TS Time and Programme setting

### Time setting

Press  to enter time setting mode. Each press of  will switch between Hour, Minute & Day (Days being 1234567, Mon is 1), use  or  to adjust the settings.

### Default Time Periods

Period	Icon	Default Period Time	Default Period Temperature
Working Day	1 	06:00	20°C
	2 	08:00	15°C
	3 	11:30	15°C
	4 	12:30	15°C
	5 	17:30	22°C
	6 	22:00	15°C
Weekend	1 	08:00	22°C
	2 	23:00	15°C

As can be seen in the above table, Period 1 is set to turn the heating on at 06:00AM. The thermostat will keep the temperature at 20°C until 08:00AM, at which point Period 2 is set to start, with the temperature reduced to 15°C. This temperature is then maintained through Periods 2, 3 & 4, and at Period 5, 17:30 PM, the temperature is raised to 22°C, and reduced again at the start of Period 6 to 15°C, until 06:00AM, when the cycle starts a new day.

If days 1234567 is selected, the time periods will be the same for each day. If 123456 is selected, Sunday will only have 2 time periods.

If 12345 is selected, Saturday and Sunday will have 2 time periods each.

**Setting the temperature to 00 °C will make a time period INACTIVE.**

### Time Period & Temperature Programming

- 1) Press and hold  button until the display shows "Loop" (cycle control); then press  or  to choose **12345** (Mon to Fri), or **123456** (Mon to Sat) or **1234567** (Mon to Sun).
- 2) Press  to enter the 1<sup>st</sup> time period ( icons are displayed for each period) and use  or  to set the desired temperature.
- 3) Press  to set the required start hour by pressing  and , and press  again to set the minutes.
- 4) Press  to switch to the next time period, and repeat as above.
- 4) Continue with  to access the remaining time periods.

The Auto icon  is displayed when the thermostat is in Auto mode.

Pressing " or " during a time period will switch over to temporary manual control  where the temperature may be set to override the Auto setting.

Auto mode is restored at the start of the next time period.

Pressing  switches between Auto  and Manual mode.
